Targeted Intervention Solutions

Individualized Learning Paths based on MAP® assessment data from NWEA™

Edgenuity™ and Northwest Evaluation Association (NWEA™) have partnered to create a new English language arts and mathematics integration for students in grades 6–12. Combining best-in-class online instruction and assessment, this integration is ideal for any school or district implementing a Response to Intervention (RtI) plan.* The National Center for RTI has approved MAP as a universal screener.

Easy-to-implement solution for middle and high schools

Based on students’ MAP assessment results, Edgenuity’s learning management system creates Individualized Learning Paths (ILPs) focusing on the skills and concepts each student needs most to be successful in high school and beyond.

1. Import MAP data
   Educators can import student MAP data from NWEA’s reporting system into Edgenuity.

2. Review and assign ILPs
   Edgenuity’s learning management system displays student MAP scores along with suggested learning paths for each student.

3. Monitor student performance
   Combine Edgenuity’s activity-specific summaries with MAP’s ability to measure student growth over time, independent of grade level.

*Purchase of both Edgenuity and NWEA’s MAP is required to enable the integration.
Individualized Learning Paths for students

Edgenuity’s MAP-informed Individualized Learning Paths are fully aligned to the Common Core and state standards.

Targeted content for student success
Our ELA intervention paths focus on reading comprehension and literary analysis with a strong emphasis on literary nonfiction and informational text, as well as grammar and mechanics. Edgenuity’s math paths are carefully sequenced to provide the concepts and skills required for success in Algebra, including number properties and arithmetic with integers and rational numbers, proportional reasoning and relationships, and basic algebraic manipulations.

Powerful instruction and reporting
Each path contains video lessons featuring interactive tasks, activities, and robust practice with immediate feedback. With Edgenuity’s award-winning instruction, students gain the skills they need and refine any misconceptions they may hold. Teachers and administrators can quickly identify student weaknesses and intervene immediately with a combination of NWEA’s robust reporting and Edgenuity’s continuous progress monitoring and gradebook.

The onscreen teacher explains concepts, provides examples, and makes real-world connections.

Graphic organizers and tables are used to present information, help students see patterns, and manipulate equations.
