

Online Intervention
for Grades 6–12

Meet Students Where They Are

Provide struggling students with a differentiated, online intervention program using MyPath™. MyPath's instruction ranges from the 3rd- to 11th-grade skill level, but speaks to students at their age level, using age-appropriate content to keep learners engaged and motivated. And with easy-to-access, actionable data, it's simple for educators to monitor student progress in real time.

How It Works

ASSESS NEEDS

Students take a placement exam to determine students' initial proficiency level. Or, teachers can import student data from NWEA® MAP® Growth™ Scantron® Performance Series®, and Renaissance Star 360® assessments.

PERSONALIZE INSTRUCTION

Based on the assessment data, each student is assigned an Individualized Learning Path (ILP) that focuses on the skills and concepts they're ready to learn. Age-appropriate instruction and practice provides intervention, remediation, or enrichment opportunities for students.

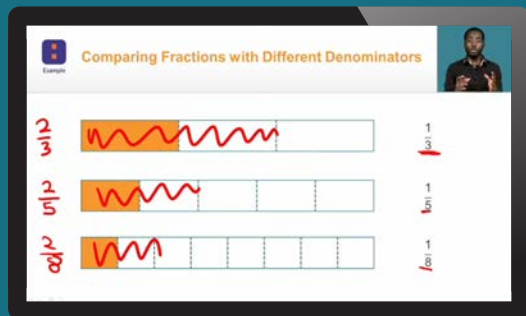

MONITOR PROGRESS

Educators receive detailed and dynamic reports in real time. So you'll know which students are ready to move on, which students need extra help, and how to group students with similar needs for targeted reteaching.

Instruction That Drives Success

Every MyPath lesson includes a gradual-release instructional model so students receive both the instruction and practice they need to master each skill.

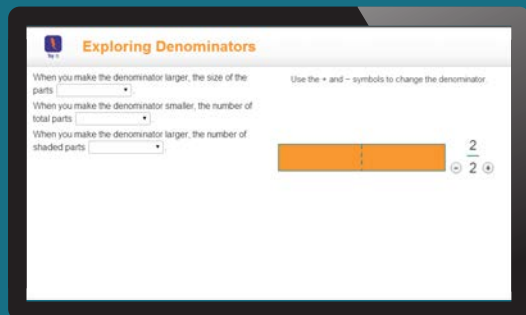

DIRECT INSTRUCTION

Expert on-screen instructors deliver age-appropriate instruction about the skill or concept. Students receive examples, modeling, and real-world connections to help them see the relevance of what they learn.

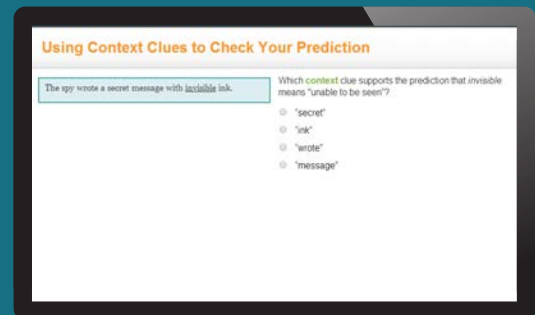

SUPPORTED PRACTICE

Students practice the skills they just learned in interactive practice tasks. Scaffolds, such as audio feedback, guide students towards competency.

INDEPENDENT PRACTICE

As students work through an activity, they'll have more opportunities to practice the skill on their own, receiving feedback after the task.

ASSESSMENTS

Activity quizzes and unit tests inform continuous feedback for students and teachers. So educators can instantly identify the topics students are struggling with, and provide immediate support.

Tools That Inspire Understanding

Students have access to a wide variety of tools and scaffolds designed to support learning and promote a deeper understanding of content. Our CloseReader™ encourages the active reading of complex texts, while read alouds and lesson transcripts make content accessible to all students. Additional learning tools—such as eNotes, highlighters, and calculators—help students complete assignments.
