

Edgenuity® Special Education Coordinators

Additional support for students with special educational needs

Many students with special educational needs don't get the individualized accommodations and support they need to excel in school.

Partnering with Edgenuity Instructional Services gives you the resources and guidance you need to support all of your students, including English learners, those who are homebound, and those who have IEPs or 504 plans.

Instructional Services offers multiple layers of support, including state-certified virtual instructors who can act as the teacher of record, and Special Education Coordinators who help ensure students with special educational needs are fully supported.

Special Education Coordinators work with Edgenuity virtual instructors and school or district personnel to assist with:

- Student intake
- Course customization
- Monitoring and reviewing performance
- Providing input on updates to IEPs and 504 plans
- Offering support and resources for IEP team meetings and parent conferences

Special Education Coordinators ensure all student accommodations and modifications are met so students have all the support they need to be successful now and in the future.

How Does Edgenuity Support Exceptional Learners?

In addition to our state-certified virtual instructors who prioritize student success and special education coordinators who ensure each student's academic needs are met, Edgenuity's courses were built using evidence-based practices and feature instructional strategies, learning tools, and scaffolds designed to support the unique needs of all students.

OUR COURSES:

- **Provide explicit instruction from expert on-screen instructors.**

Our instructors offer clear and concise explanations, and use real-world examples to help students thoroughly understand subject matter.

- **Model learning strategies.**

On-screen teachers show students how to identify and use appropriate learning strategies, as well as how to monitor their own understanding of material.

- **Make instruction accessible.**

Courses feature video lectures, graphic displays, text, and simulations. When completing tasks and assignments, students manipulate images, answer questions, fill out graphic organizers, and more, allowing them to demonstrate their knowledge in a variety of ways.

- **Are self-paced.**

Students can work through the courses at their own pace and can easily pick back up where they stopped, which leads to more engagement and no lost learning time.

- **Feature several learning tools and scaffolds.**

Our courses offer text read aloud and translation, video captioning, a dynamic glossary and word look-up tool, Guided Notes in select core courses, and more, so students have all the tools and resources they need to be successful.
