Odyssey™ and CompassLearning High School™ are no longer available for new implementation but are supported by Edgenuity. Network requirements within this document should be applied for these products.

- Power PC and Windows XP are no longer supported.
- Please allow third-party cookies within browser. Chrome browser versions 42 or later may not allow functionality for some plug-ins. As of April, 2017 Microsoft Vista™ is no longer a supported operating system by Microsoft.
- A slow Internet connection will affect the performance of multimedia elements found in the CompassLearning courses.
- Students will need access to audio capabilities including speakers and/or headsets.
- All instructional computer stations will need sufficient network-user permissions to ensure full functionality when using certain plug-in applications. QuickTime is required for CompassLearning High School elective courses only. Sun Java and Adobe Shockwave Player 10 or 11 are required for ELL learning activities.
- Hybridge and Pathblazer content in K-6 is iPad compatible; content from grades 7 and 8 will be compatible in December 2018. Android™ tablets, smart phones, and smart watch devices are not supported.
- Certain tasks and teacher-created Authentic Tasks require Internet access. In the interest of security standards and IT best practices, Edgenuity recommends you ONLY whitelist URLs to which your users need access, and only when access is needed. Some content filters, web proxies, and/or classroom management software may also require additional white listing within your network.

Some software products marketed by Edgenuity and its distributors contain proprietary software components of other software vendors. Windows and Internet Explorer are registered trademarks of Microsoft Corporation in the United States and other countries.
