Odyssey and Compass Learning High School are no longer available for new implementations but are supported by Edgenuity. Network requirements within this document should be applied for these products.

- Please allow third-party cookies within the browser. Chrome browser versions 42 or later may not allow functionality for some plug-ins.
- Students will need access to audio capabilities including speakers and/or headsets.
- A slow Internet connection will affect the performance of multimedia elements found in the Pathblazer courses.
- All Instructional computer stations will require sufficient network-user permissions to ensure full functionality when using certain plug-in applications.
- Pathblazer is not Android® tablet compatible at this time. Smart phone and smart watch devices are not supported.
- Certain tasks and teacher-created Authentic Tasks require Internet access. In the interest of security standards and IT best practices, Edgenuity recommends you ONLY whitelist URLs to which your users need access, and only when access is needed. Some Content filters, web proxies, and/or classroom management software may also require additional white listing within your network.
