Elementary School

Foundational Skills + Intervention Solutions for Students in Grades K–6
Flexible Solutions that Ensure All Children Are on a Path to Success

Elementary school teachers need engaging tools they can use throughout the school day to help students build foundational learning skills. Edgenuity’s online solutions ensure our youngest learners receive the instruction and practice they need to close early gaps and master essential skills in mathematics and reading in order to be successful learners today and in the future.

Foundational Skills

Reinforce essential grade-level skills in math and reading.

Hybridge® offers dynamic online content that can be used alongside core instruction to help students practice and master grade-level skills. This flexible program is aligned to Common Core and state standards and offers an easy transition to blended learning in elementary school classrooms.

- **TEACHER CONTROL:** Teachers can use a lesson-driven model that aligns to your class or district scope and sequence. Or, teachers can enable individual learning progressions based on diagnostic results so each student receives precisely the right instruction when needed.

- **ENGAGING INSTRUCTION:** Dynamic, interactive, and age-appropriate videos, animation, and manipulatives deliver explicit instruction, guided practice, independent practice, just-in-time reteaching, and assessments.

- **EMBEDDED SCAFFOLDS:** Hybridge offers continuous learning support, including answer-specific feedback and non-repetitive reteaching, so when a student doesn’t understand a skill, he or she doesn’t just see the same thing over again.

- **ASSESSMENT INTEGRATIONS:** Hybridge integrates fully with NWEA™ MAP® Growth™, Scantron® Performance Series®, and Renaissance Star 360® assessments to deliver instruction based directly on trusted assessment results.
Personalized Intervention

Close gaps to help ensure students are on a path to success.

Because solid literacy skills and core math concepts are key first steps toward academic success, Pathblazer® gives students the support they need to move toward grade-level proficiency.

- **ASSESS STUDENTS:** Students begin with an adaptive screener to determine functional level, then take a diagnostic pretest to pinpoint specific skill gaps. Or, schools can import data from Renaissance Star 360, NWEA MAP Growth, or Scantron Performance Series assessments to create prescriptive learning paths with no additional testing.

- **PROVIDE PERSONALIZED INSTRUCTION:** Each student is provided with an individualized learning path designed to fill gaps and accelerate them to on-level mastery. All lessons are built around a gradual-release instructional model of explicit instruction, supported practice, independent practice, and assessment.

- **MONITOR PROGRESS:** Pathblazer intervention reports track student progress toward standards mastery, inform small group instruction, and help teachers plan for one-on-one time with students.
Continuous Learning Support

Every lesson in Hybridge and Pathblazer includes a gradual-release instructional model so students receive both the instruction and practice they need to master each skill.

**EXPLICIT INSTRUCTION**

**SUPPORTED PRACTICE**

**INDEPENDENT PRACTICE**

**ASSESSMENTS**
