

Reports and Data

Edgenuity's Learning
Management System

Reports and Data

Edgenuity's learning management system collects and organizes student data and generates a variety of reports available for students, educators, and parents. These reports are available by student, group, course, school, and even for the district as a whole. Standard Edgenuity reports currently available include:

Contents

Course % Complete	8
Family Portal	9

Single-Student Reports

These reports summarize data for an individual student.

Progress Report

For a single student, the course progress report shows percentage completion, activity scores, activity count (total and completed), and the weighting and overall scores by activity type. This report provides a snapshot of the student's progress and achievement in a single course.

Progress reports can be accessed or printed any time for students and teachers. These reports can be emailed directly to parents or guardians, or they can be set up with access to the Family Portal to view them at any time. As students submit assignments, they receive immediate feedback and the progress report is updated in the live system. Since data is recorded and updated in real time, students can monitor their progress and will know exactly where they stand in relation to completing the course on time.

Progress Reports make it easy to identify whether students are on track to complete courses within the allotted timeframe and determine the grade they have earned for submitted work (overall grade), the grade if they were to leave the class without doing any more work and receive zeros for the incomplete work (relative grade), or the grade in relation to the percentage of coursework completed vs. the percentage of coursework that should have been completed (actual grade).

Session Log

Teachers and administrators can review the amount of time a student has logged in the system, including the amount of time the student had the system open but was idle. Using date ranges, teachers have a weekly overview of total work in addition to a breakdown of individual session work. The attendance log not only tracks student time on task, but it will also allow teachers to view a student's idle time, which could indicate review time or time spent using the student organizer tools.

With the Family Portal, parents and guardians have unlimited access to the student's attendance log. The attendance data for teachers and families is available at any time.

Session Log For: Artz, Langrid

Idle Time	3 Mins	

Reports and Data (continued)

Score Overview

The Score Overview allows teachers to monitor student work on a per-course basis. This report not only shows the lesson and activities completed within a course, but it also allows teachers to view the scores, attempts, and submission dates associated with those activities. With sorting and exporting features, teachers can easily assess student progress throughout the duration of the course.

From this report, educators can also see whether any activities require grading. They can view student work from here, review and grade it, and leave feedback for students.

Student's Score Overview

This page is used to pull overall grade data for a student's course. Use the course drop-down list to select the student's course. Pick what types of assignments that you would like to view from the Activity Types drop-down list. If you know the date the student submitted an activity, you can enter that data in the time fields. You can leave the time fields blank to pull all assignments, regardless of what time they were taken.

Course:

Activity Types: Begin Time: End Time:

Lesson	Activity	Counted	Score	Attempts	Submit Date	Action Required
Writing: Descriptive Essay: Favorite Villain	Revising Activity	Pending		1	4/30/2014 6:37:34 AM	Yes
Writing: Descriptive Essay: Favorite Villain	Revising Lecture	No	100	1	4/30/2014 6:34:08 AM	No

Assignment Calendar

Both students and teachers have access to the auto-generated Assignment Calendar for courses. Based on the timeline of the individual student's course provided by the teacher, in conjunction with the district calendar that excludes any non-school days, the Assignment Calendar is a daily list of activities that students should complete in order to meet the target completion date for the course. This report sets expectations for students and will help them manage their coursework towards a successful completion.

Educators can also use this report to look back at the assignments students completed each week, which appear in green, and the total percentage of the course completed as of the completion of each activity. For example, when the student whose Assignment Calendar is pictured below finished the Direct Instruction in the lesson titled "Apply Laws of Exponents" in Week 1, he was 1.89% of the way through the entire course.

ASSIGNMENT CALENDAR

Course: Week:

- Lab Lecture (0 min) 0.87%

Reports and Data (continued)

Group Reports

These reports summarize data for multiple students. These could be students all taking the same course or students in some other system- or user-defined group.

Group Progress Report

Teachers and administrators are able to view student progress reports individually, and administrators may review a whole-group progress report. The progress overview demonstrates the currently available information about a group of students. The administrator at the school level will be able to view the reports for students enrolled at the site; district administrators will be able to view information for all students in all schools in the district.

Group Progress Overview

This page gives an overview of progress for a group of students. Progress is calculated at the end of the day for each student, so these figures may be delayed up to 24 hours. To view the most current progress for a student, click on the student's name.

% (Time) - The percent complete weighted by time.
 % (Count) - The percent complete by number of assignments completed.
 RG - The relative grade which assumes that the user will receive zeros for any incomplete activities.
 OG - The overall grade for only work that the student has completed.
 AG - The actual grade based on the overall grade in relation to time elapsed.

Dashboard

The Dashboard feature is a user-friendly way of managing large groups of students from one centralized location. Teachers and Administrators can easily identify and intervene with students who are falling behind or who need additional support. Students who are prevented from progressing in the courses are also easily managed through the alert system, providing teachers with real-time data so they can effectively manage their students. With the wide range of filters available for courses and students, teachers can narrow the list of students that appear in the Dashboard.

Reports and Data (continued)

Attendance Log

The Attendance Log provides an overview of student attendance, either for the school or for specific groups of students. Teachers can monitor the Attendance Log to view the total time a student spends daily, the number of assessments completed daily, or to monitor the weekly total time for each student.

Lesson Mastery Report

This report will provide an at-a-glance view of how students are performing in all the lessons in a course, in order to identify and group students for re-teaching. For each lesson, educators can view how many students are struggling with the lesson, how many are active in the lesson, and a number of other statistics. The report can be filtered by standard, and it can be sorted by lesson difficulty or any other of the columns displayed. Educators can drill into any lesson to view which students are struggling and/or active, with visibility into the assessment questions and individual student responses for targeted, real-time intervention.

Reports and Data (continued)

School and District Reports

These reports summarize student and teacher data at the school or district level, and are intended for administrators.

Recent Actions Log

Searchable by student, teacher, action, or date, the Recent Actions Log is an important tool that enables teachers and administrators to monitor the system for updates to accounts and courses.

For example, administrators can review how often grades have been changed by teachers, how many times students have been given a bypass for an assignment or test, and whether new users have been added. Through this report, administrators can monitor teachers to ensure district policies for actions such as changing grades or assigning courses are followed.

Recent Actions Log

This page lists recent actions taken by instructors and administrators. It includes records for items such as changed grades, and added users. Click an item from the actions list below to view information about that action.

Total	2	2	2	18	19	34	23	100

Course % Complete

This report allows administrators to summarize percentage completion by decile, by school. For example, in the report below there are two students at Main Street Middle School who have completed between 0 and 9.99% of their coursework. There are three students at that school within 10% of completing their coursework.

Schools	0-10	10-20	20-30	30-40	40-50	50-60	60-70	70-80	80-90	90-100	Grand Total

Reports and Data (continued)

Family Portal

Parents and guardians have 24/7 access to Edgenuity's Family Portal, where they can log in to view their child's attendance log and progress report. If desired, teachers can even set up daily, weekly, or monthly emails for parents or guardians (or tutors, court officers, mentors, or other adults with appropriate permission to view student data). When this feature is enabled, parents and guardians will receive regular updates on student progress and activity.
