

# Flexible Summer School Implementations Help Students Succeed

## Help students make the most of their summer break

For many students, the summer break provides a great opportunity to continue learning. Some students use the time to catch up or recover credits or concepts they missed during the school year. Others may use the time to work ahead or explore new interests and subjects they don't have time for during the school year.

Whether you require courses for credit recovery, acceleration, or intervention, Edgenuity® can help you establish a summer school program that works best for you and your school community.

## Flexible Options for Your Summer School Needs

### TRADITIONAL SUMMER SCHOOL

You provide the teachers, we provide the online courses.

Your own district instructors can teach Edgenuity courses on site, or allow students to divide online learning between school and home.

### VIRTUAL SUMMER SCHOOL

We provide the instructors and the online courses.

With our state-certified virtual instructors, students can complete their work entirely online, helping you keep operating costs down.

## Keep Your Students Learning and Growing Over the Summer

Whether your students need the summer to catch up to their classmates, explore new interests, or something else entirely, we'll help you design a program that fits your needs. With Edgenuity, students can use their summer break for:

- Course acceleration or advancement
- Credit or concept recovery, to help them graduate on time
- Preparing to enter high school with our summer bridge course suite
- Exploring interests by taking career and general elective and foreign language courses
- National and state test preparation, including the SBAC, PARCC, PSAT®, SAT®, ACT®, and GED®
- Targeted intervention in reading and math
