

MyPath[®]

Online Intervention for Grades 6–12

Building Confidence is the Key

The ability to provide struggling students with personalized intervention is crucial to their future success. Meeting students where they are and building confidence is the key to accelerating achievement.

MyPath® enables educators to provide secondary students with age-appropriate instruction, practice, and assessment to help them catch up, keep up, and get ahead. It speaks to students at their age level with engaging and motivating content that transforms the way they learn.

How It Works

ASSESS NEEDS

Students take a placement exam to determine their initial proficiency level. Or teachers can import student data from NWEA® MAP® Growth™, Scantron® Performance Series®, and Renaissance Star 360® assessments to leverage trusted data and cut down on time spent testing.

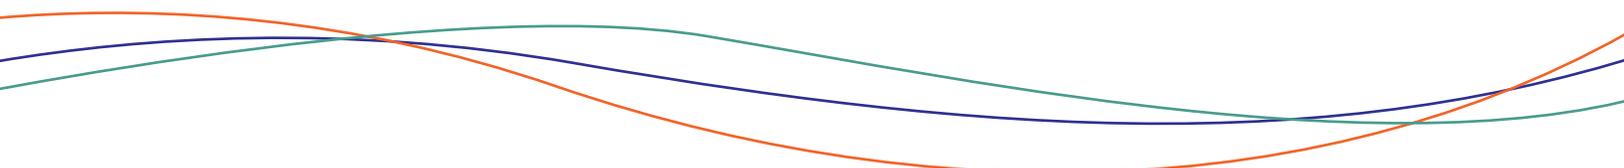

PERSONALIZE INSTRUCTION

Based on the assessment data, each student is assigned an individualized learning path (ILP) that focuses on the skills and concepts they're ready to learn. Age-appropriate instruction and practice provide intervention, remediation, or enrichment opportunities for students.

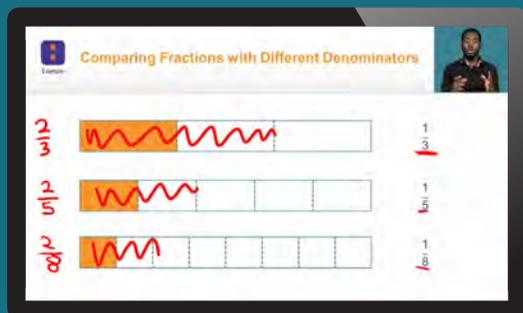

MONITOR PROGRESS

Teachers receive detailed and dynamic reports in real time so you know which students are ready to move on and which need extra help, and how to group students with similar needs for targeted reteaching.

Target Your Students' Needs

MyPath's gradual-release instructional model ensures that students build a solid foundation of skills in ELA and math. The instruction in MyPath spans skills and concepts covered in grades 3–11, all designed and presented in a format appropriate for middle- and high-school learners.

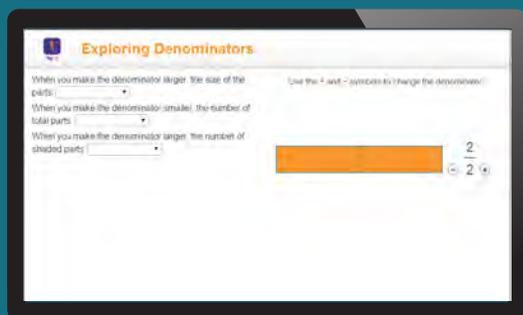

DIRECT INSTRUCTION

Expert on-screen instructors deliver age-appropriate instruction about the skill or concept. Students are presented with examples, modeling, and real-world connections to help them see the relevance of what they're learning.

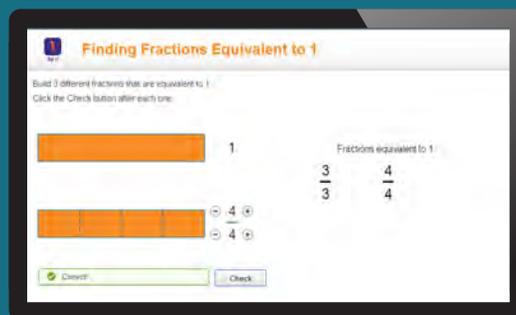

SUPPORTED PRACTICE

Students practice the skills they just learned in interactive practice tasks. Scaffolds, such as audio feedback, guide students toward competency.

INDEPENDENT PRACTICE

As students work through an activity, they'll have more opportunities to practice the skill on their own, receiving feedback after the task.

ASSESSMENTS

Activity quizzes and unit tests inform continuous feedback for students and teachers, so educators can instantly identify the topics students are struggling with and provide immediate support.

The MyPath Edge

Students have access to a wide variety of tools and scaffolds designed to support learning and promote a deeper understanding of content. Our CloseReader™ encourages the active reading of complex texts, while read alouds and lesson transcripts make content accessible to all students. Additional learning tools—such as eNotes, highlighters, and calculators—help students as they complete assignments.

Teacher Powered Technology™

MyPath is designed by educators for educators to enhance teaching and drive student success. It empowers educators to teach the way today's students learn by leveraging technology in a way that integrates seamlessly with their teaching style. Boost your impact in the classroom with Teacher Powered Technology.

“Edgenuity MyPath should be made available to every teacher, in every school and educational setting, where each and every student's educational needs are imperative.”
