

Addressing Learning Loss in Tennessee Schools 2021-2022

After schools closed their doors in the spring, concerns about learning loss and readiness for the next school year started growing. Students and teachers need resources to help mitigate the pronounced learning loss resulting from the closures and get students back up to speed. Here are new options from Edgenuity to help:

LEARNZILLION

LearnZillion helps schools and districts transform the classroom experience, both for teachers and students, and is included on Tennessee's list of state-approved curricula.

Our learning platform and math and ELA curriculum offer teachers the power of engaging, customizable, classroom-ready tools to save time on administrative tasks and spend more time helping students achieve greater academic outcomes. LearnZillion strips back the drudgery of lesson prep by enabling teachers to focus their time where it counts—connecting with individual students, engaging creatively, and customizing curriculum for a more significant impact.

We equip teachers with a full suite of effective tools and digital materials in an intuitive, easy-to-use platform, which offers:

- Seamless integration for strategic, district-wide instruction
- Classroom-ready lesson plans, teaching guides, and additional planning materials
- Standards-aligned, high-quality K–12 curriculum with both digital and print resources
- Clear data to inform instruction

LearnZillion is also included on Tennessee's list of state-approved curricula.

BOOSTER COURSES 6-12

Booster Courses are built around power standards in math and English language arts to ensure students learn essential content and skills. Students begin by taking an upfront diagnostic to determine their understanding of the overall course content. Each lesson begins with a pretest to assess a student's proficiency in the skills covered in that lesson, enabling them to focus on skills they have yet to master to boost their knowledge. Courses are designed to be completed in six weeks but can be completed more quickly depending on existing knowledge.

LEARNING LOSS COURSES 6-12

Learning Loss Courses are nine-week courses in the four core subjects designed to help ensure that students understand the content, skills, and standards addressed during school closures, so they are ready to learn new material. Teachers can customize the content in these courses, which provide an effective learning solution that supports both progress monitoring and accountability to help meet state or federal funding requirements.

CHARACTER EDUCATION AND SOCIAL EMOTIONAL LEARNING K-12

In response to evolving cultural changes, Edgenuity, in partnership with Purpose Prep, has added a new suite of SEL courses for grades 6–12, including Climate & Culture Transformation, Restorative Practices & Principles, and Trauma-Informed Living. These new courses have been added to our existing courses to provide a flexible library of K–12 SEL content to meet the diverse needs of all students.

EDGENUITY K-5 CONTINUITY OF LEARNING

Designed especially for a six-week summer learning camp, LearnZillion courses are created by teachers for teachers. The EL Education curriculum is a comprehensive, research-informed, core language arts program that engages teachers and students through compelling, real-world content.

The EL Education K–8 Language Arts curriculum earned all green scores from independent reviewer EdReports. It also received a prestigious tier one rating on the Instructional Materials Evaluation Tool for Alignment in ELA Grades K–12 (IMET), which reviews curricula for text quality, range and volume of texts, coherence, text-dependent questions, writing to sources, speaking, listening, language, assessment, scaffolding, and support.

We've partnered with Illustrative Mathematics, designed under the leadership of Dr. Bill McCallum, to develop the first IM-certified curricula for grades kindergarten through high school. The IM K–5 Math curriculum is based on researched principles and learning trajectories, as well as our experience with how teachers use materials to provide teachers the tools they need to promote student success. There are three overarching and interconnected principles—learning, teaching, and equity—that are foundational to everything we create and guide our understanding of K–5 math teaching and learning and who can and should learn mathematics.

These overarching principles inform our more specific design principles to support student and teacher learning and usability. LearnZillion IM for grades 6–8 and Algebra, Geometry, Algebra 2 not only scored 'green' on every EdReports metric but also works seamlessly with your LMS, making it easier for teachers to plan and orchestrate student discussions. It's the highest quality math program powered by a best-in-class digital delivery, resulting in positive student outcomes in math.

EQUITY OF ACCESS

We strive to provide opportunity, access and outcomes for students through the use of our Teacher Powered Technology. Edgenuity courses, curriculum, and online learning solutions feature instructional strategies, evidence-based practices, and learning tools designed to support teachers as they work with the unique needs of all learners, including students with special educational needs.

Online and blended learning options offer the flexibility and individualized instruction that isn't always available with traditional classroom instruction, allowing students to complete their work at their own pace in a setting that works best for them. We want every student to have an equal opportunity to succeed, no matter their school, home, or personal situations.

6–12 SEL IN RESPONSE TO COVID-19

This module supports teachers and students in addressing the trauma and loss caused by the COVID-19 pandemic. Students will learn about healthy emotional responses and strategies, building and maintaining healthy relationships, and defining purpose from the Purpose Prep experts. Teachers can utilize the discussion questions to facilitate group discussion, written responses, or individual conversations.

SUMMERBRIDGE COURSE SUITE

Our SummerBridge course suite helps prepare rising sixth graders for the increased rigor of middle school and rising ninth graders for high school. Each course features interactive instruction, practice tasks, assignments, and assessments to provide targeted reinforcement so students are ready for grade-level work and can successfully make these critical transitions.
